

TECHNICAL DIAGRAM ANOMALY & SELF-HEALING REPORT

Generated by Error-Aware VQA & Self-Healing AI Platform | Final Year B.Tech Project

Diagram Type:	Flowchart	Processing Time:	0.1 s
Detected Symbols:	6	Detected Text Segments:	6
Validation Status:	ANOMALIES DETECTED	Total Errors Found:	1

1. Detected Symbol & OCR Extraction Matrix

Node ID	Shape Symbol	Extracted Label / Text	Confidence
node_1	Start	START / BEGIN	93.0%
node_2	Input/Output	READ Number X	94.0%
node_3	Process	Calculate Output = X + 10	93.0%
node_4	Decision	Is X > 10 ?	94.0%
node_5	Process	Display Error Alert	95.0%
node_6	End	END / FINISH	94.0%

2. Anomaly Reasoning & Self-Healing Log

ID	Anomaly Code	Severity	Reasoning & Suggested Repair
ANOM_001	ERR_DEAD_END	HIGH	Reason: Node [node_5] reaches a non-terminal state without any outgoing directed transition. Repair: Connect node [node_5] to the primary flow stream or terminal END block.

3. Visual Question Answering Interaction Log

Question	AI Answer	Confidence
How many decision nodes are present?	There are 1 decision node(s) in this technical diagram: [node_4: 'Is X > 10 ?'].	98.0%
